

**A GOOD EDUCATION,  
A GOOD FUTURE,  
A GOOD LIFE;**

**#TercihMeselesi**

# WHY LOKMAN HEKİM UNIVERSITY?

## **An innovative understanding in health education.**

Think of a future; you will train with an understanding that is facing the West with all the innovations in the field of health and that is facing the East with all the conventional facts valid for thousands of years with indisputable benefit, you will train with conventional and modern science of medicine at the same time and perhaps you will be able to develop new treatment methods named after you.

## **Opportunity of hands-on training in modern and state of the art technology laboratories.**

Think of a future; you will be able to make research with competent persons in multi-disciplinary laboratories where you are provided with any opportunities that will help you become competent in the field of health, that you will use for the first time, built with state-of-the-art-technology, equipped with modern equipment.

## **Opportunity of making research and taking place in projects together with the faculty.**

Think of a future; there are many educators who conduct projects and make research at your university where you can receive undergraduate and postgraduate education, and who will help you take place in projects and enable you to make research and use advanced laboratory equipment.

## **Opportunity of gaining a global vision by taking lessons from the foreign faculty.**

Think of a future; Your University gathers you with the best faculty of the world at school or at distance education programs. In this way, your foreign language improves, and you meet values that may give a reference about you for postgraduate education and moreover, for business life.

### **Programs for our students who prepare for TUS and USMLE examinations at university.**

Think of a future; there are teachers employed at the university where you study who are experienced in preparation for TUS examinations. Any support that you will need is beside you. You also have encouragement and support for preparing for USMLE examinations, which are valid all over the world.

### **Opportunity of working on cadavers for students of Medicine and Health Sciences.**

Think of a future; you are at the health department of a university backed with the support and name of a large healthcare organization. Everything is real, everything is professional, and you are working on cadavers and realistic models in order to understand human health and contribute to human health.

### **Opportunity of education and internship in different countries through international student exchange.**

Think of a future; your university has made all agreements with the relevant institutions, and there is nothing left that prevents you from receiving education abroad, Erasmus being in the first place. Hurry up, perhaps your internship agreement will have already been made.

### **Opportunity of having two diplomas through double major and minor.**

Think of a future; you are a very successful student, and you enroll in another department in addition to the field in which you are enrolled at your university, and you graduate with two diplomas.

**Opportunity of internship and working at modern hospitals all across Ankara during education.**

Think of a future; since your university has been affiliated to / cooperate with Lokman Hekim Health Group, you will be able to conduct practices and studies at hospitals and centers at four different locations in Ankara, and you will even be able to have a job shortly after you graduate.

**Opportunity of education with continuous scholarship during education.**

Think of a future; you will not be worried about scholarship interruption regardless of your grade-point average or the number of courses you pass during the normal education period of the program you are enrolled in.

**The first Conventional and Complementary Medicine Practices and Research Center within a foundation university in Ankara.**

Think of a future; there is a Conventional and Complementary Medicine Practices Center at your university, and new treatment methods combining the conventional medicine applied for thousands of years and the modern medicine practices are developed before you, even with you.

**A university in the city center, easy to access, and having social opportunities.**

Think of a future; your university is at a distance where you can access by any means of transport and from which you can go anywhere without any waste of time and money, that is, in the center of Ankara and any social opportunity that you may need not just for the sake of conversation, but really...

**Comfortable, modern, technological educational and recreational areas for students.**

Think of a future; you receive an education in which you have access to internet, areas for you that relax, entertain, and socialize you and where you can eat and drink in a healthy way, and where you find vast opportunities of research and study in a lighted, quiet, and disabled-friendly library at your university...
