

LHU INTERNATIONAL RESEARCHER PROGRAM

LHU International Researcher Program

For incoming graduate studies, post-doc, early career and senior researchers

You are very welcome to Lokman Hekim University (LHU) for your research career! LHU ensures advancement and dissemination of science through research while adhering to ethical and cultural values. The university is committed to improving the quality of life at every level.

We are delighted to have you in our research and education team. We hope you will enjoy your time at our country, city and university. We are sure your study with the LHU family will contribute to your academic career while stimulating your innovative skills. We truly value our researchers here at LHU. We recognize the great contribution that you will make to our university. There

is a range of support on offer to you, which is outlined in this handbook. For any other questions, special conditions or queries, please feel free to get in touch with us any time.

This handbook gives you useful tips and information that we think are essential when moving to Turkey and settling in Ankara. We understand that it can be a demanding process moving to a new country and city. We will be with you at each of your steps to solve any problems. Please contact us (researcher@lokmanhekim.edu.tr , +90 312 203 95 00).

About Lokman Hekim University

LHU was founded in 2017 and as a health-oriented university in Ankara. The LH Group however is experienced in running several high-quality hospitals before converting into a university. The mission of LHU is to become the leading university in the country for students aspiring to succeed in health sciences and the professions, where original research, enterprise and inspiring teaching deliver local and global impact. LHU has an excellent reputation for research which shapes and improves lives.

Our real-world research is impactful, collaborative, excellent and sustainable, making a substantial and beneficial difference to people, organizations and health society. Our strategy is structured around the beneficiaries of LHU University, who are the parties external to the university.

MISSION

Lokman Hekim University;

- To equip its graduates with universal knowledge, skills and competencies as a leading university in health education,
 - To ensure the advancement and dissemination of science through research,
 - To contribute to the local, regional and national economy with the knowledge produced,
- Adhering to ethical and cultural values, it is committed to improving healthy life at the individual and social level.

VISION

As a health themed university that synthesizes the knowledge of the East and the West in the field of health, our vision is to be an educational and research institution that is exemplary in education, leading science, a leader in the country, preferred in the region and recognized in the world.

Before You Arrive in Ankara

1. Please contact the immigration office (<https://en.goc.gov.tr/>) for requirements, residence permits, and work permits. The time from application to acceptance can last between six to nine months so please be prepared financially for possible delays. LHU will help you with its best for this transition period.
2. English and Turkish reading, writing and speaking skills are important. Please provide certificates on TOEFL, IELTS or equivalent examination grades. In case you wish to improve your Turkish language skills, LHU will help you to find a solution.
3. Vaccination Certificate including Covid-19 vaccines and a PCR Tests during application. LHU keeps the right to ask for a full-medical report on your health status.
4. Online visa application.
5. Immigration Health Surcharge Payment.
6. Visa Fee Payment.
7. CV and Transcript
8. Letter of Intention

You need a certified translation of your study title/certificate and your exams. Some universities will provide this directly in English which is sufficient.

LHU keeps the right of asking for any other supplementary material on demand.

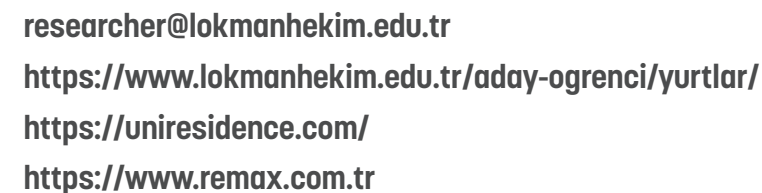

Arriving in Ankara

Ankara is the capital of the Republic of Turkey. It is centrally located in a country with a cultural and historical background. Ankara Esenboğa International Airport (ESB) (<http://www.esenbogaaairport.com/en-en/flights/arrival-flights>) is connected to various cities directly or via Istanbul or Munich. Please check the website of the airport for scheduling your travel. Istanbul (IST) or Istanbul Sabiha Gökçen (SAW) Airports are big hubs with connecting flights to Ankara. You will pick up your luggage in Ankara so be prepared to transfer from International to National in Istanbul by going through passport control. İzmir Adnan Menderes Airport (ADB) could be another transfer hub for you. Upon arrival in ESB, follow the signs and directions of the ground staff. They will transfer you to the International Arrivals. Here you will pick up your luggage and clear custom controls. In order to reach downtown Ankara, there are Airport Shuttles but you may also prefer the taxis just in

front of the exit. You may also prefer to take the high-speed train (<https://www.tcdd.gov.tr/en/>) from Istanbul to Ankara which takes about 4 h. At that time, you will arrive at the High-Speed Train Station (YHT) which is near the city center. If you prefer to drive or take an inter-city bus, then there is a highway that connects the city to most other cities of Turkey.

Ankara houses various social and scientific activities and you can enjoy a vibrant life. Most of such activities take place in private and state university including LHU. Ankara can easily be defined as a university city due to its low-cost living, easy and convenient transportation and student-oriented setting. We are certain you will enjoy your time as part of the academic community in our city. Sport, science and culture are very much connected in LHU and Ankara.

"Emlakçı" is the name for real estate agencies in Turkey. LHU may connect you to a reliable emlakçı, however they are almost always specialized for a certain district. The population of Ankara is about 5.6 million so there are a variety of districts to choose. Searching online allows you to make comparisons and you can apply filters to the various options to find the accommodation that suits you and your budget. Websites that are listed below will help you to compare prices and find exactly what you are looking for. While renting, also consider additional payment for heating with natural gas, electricity, water and maintenance charges. They may be different in districts and apartment settings. For additional requests please feel free to write to us.

LHU provides you and your family members full coverage including dentistry.
(<https://lokmanhekim.com.tr/en/uluslararasi-hasta-hizmetleri/>)
In addition, LHU will provide health insurance throughout your stay.

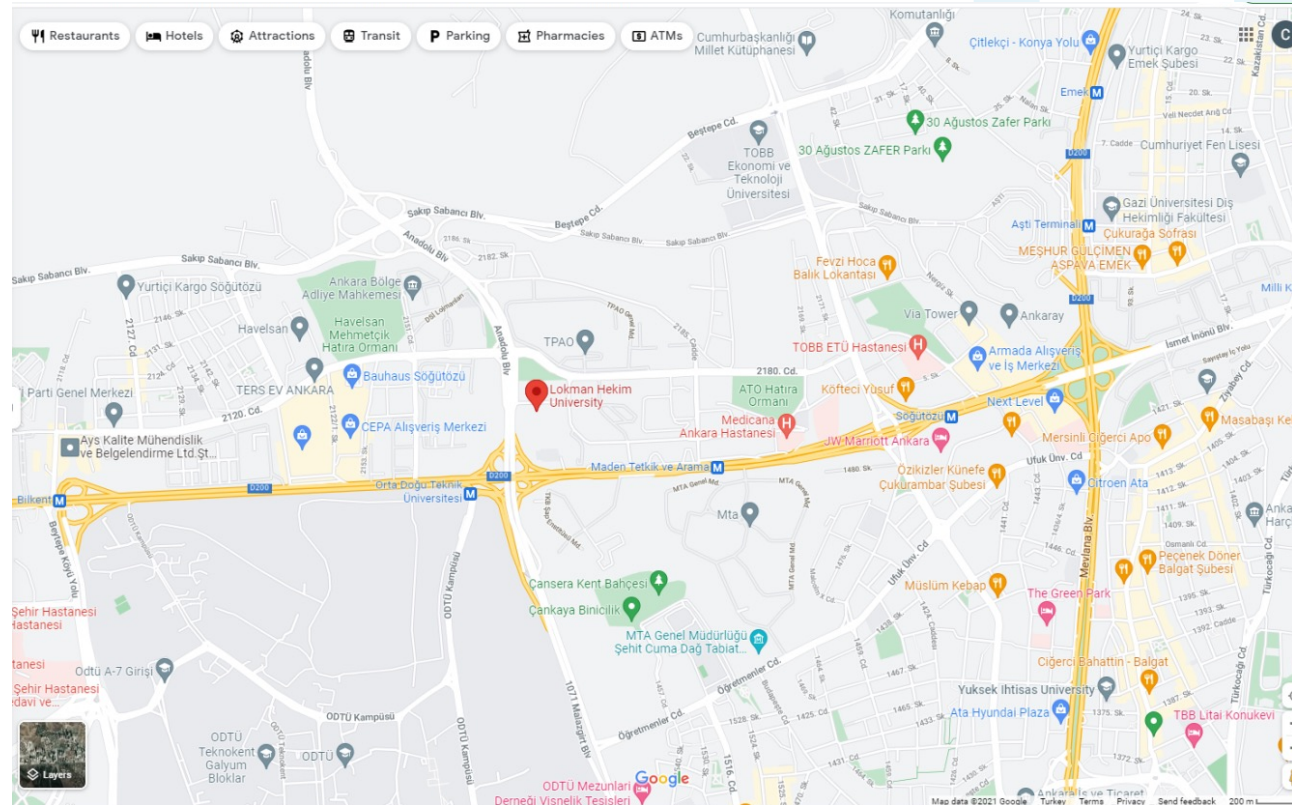

Ankara is a very safe city. Still, you may need to call the ambulance by directly dialing 112 or the police by 155. 110 is the number for fire.

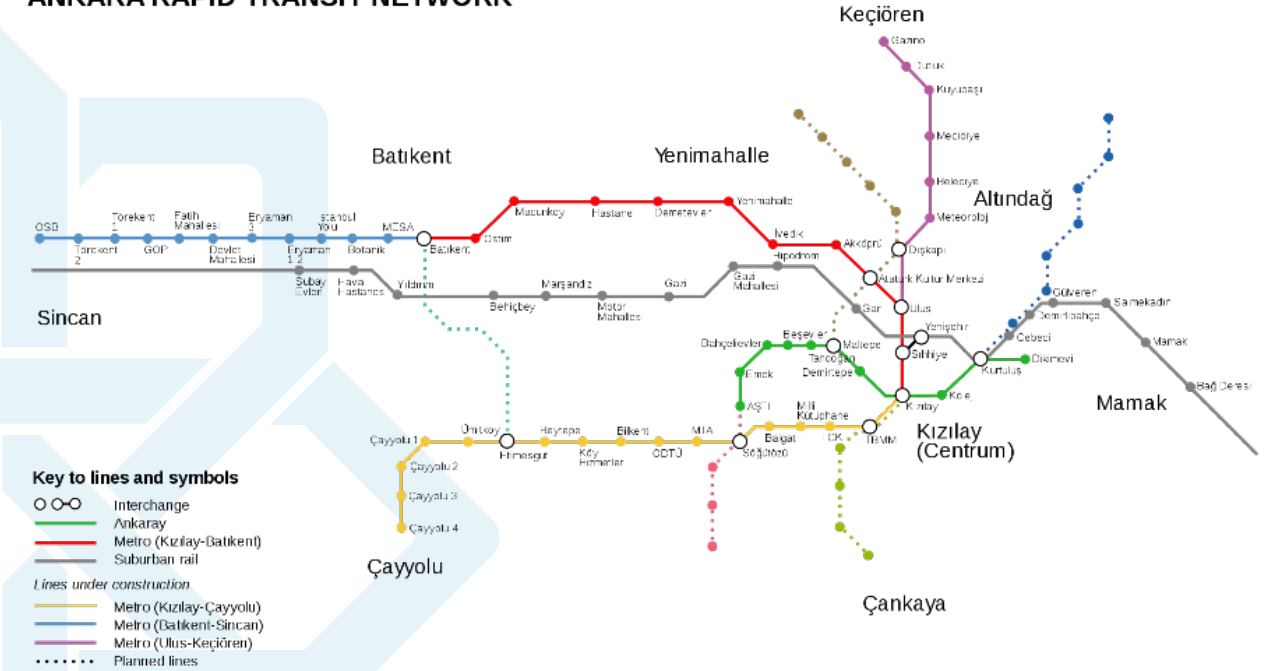

Transportation

How to get to LHU?

LHU is 8 km to the city center. The university is located 4 km away from the Intercity Bus Terminal Station (AŞTİ), 8.5 km away from the YHT Station and 34 km away from ESB Airport. Taxi prices are reasonable. They are safe and usually clean. In some taxis, you can also pay using your credit card.

ANKARA RAPID TRANSIT NETWORK

Subway (Metro)

Please take the metro in Kori Station that arrives in Ulus, Sıhhiye or Kızılay. These are major city centers of Ankara. Get off at the Maden Tetkik Arama (MTA) Station. Exit the metro in the Ministry of Economy direction. Navigate through 2177 and 2176 Streets towards the university. It takes about 10 to 15 minutes to walk from this station. Please note that you need to purchase an Ankara Kart to use the city busses and subway. A single pass works in all excluding mini-bus (dolmuş).

City Busses

Public and private busses departing from Meşrutiyet Caddesi crossing the Dumlupınar Caddesi also named as Eskişehir Yolu. Bus numbers that

511-3 (ÖTA) SİNCAN-BAKANLIK
512-3 (ÖTA) SİNCAN-BAKANLIK
512-4 (ÖTA) SİNCAN-BAKANLIK
521-3 (ÖTA) GOP (FATİH)-BAKANLIK
532-3 (ÖTA) ELVANKENT- KIZILAY
541-3 (ÖTA) ERYAMAN - KIZILAY
530-3 (ÖTA) ETİMESGUT-ULUS

pass nearby the university. Get off the bus at the 10123-bus stop before Middle East Technical University (METU or in Turkish ODTÜ) intersection. Navigate for the 2176 street afterwards. From the Ümitköy-Yaşamkent Direction, get off the bus at the 10920-bus stop after METU. Crossroad and again navigate towards the 2176 street.

Dolmuş (The Shared Mini-bus)

“Dolmuş” is a common, reasonable and preferred transportation method in Turkey. The dolmuş typically leaves when it is full. This is why it is called “filled, jammed, loaded or packed”. You can hop on and off at any convenient location. Kızılay, Sıhhiye and Ulus are city centers and there are regular dolmuş services between these centers and LHU. The ODTÜ, Ümitköy, Eryaman and Etimesgut ones stop close to LHU. You can prefer getting off at MTA or ODTÜ stops and navigate towards the university.

Cycling is an option but we do not recommend it as roads are not separated for cycling.

National Funding Opportunities

2216 - Research Fellowship Program for International Researchers

The Scientific and Technological Research Council of Turkey (TÜBİTAK) grants fellowships for international highly qualified PhD students and young post-doctoral researchers to pursue their research in Turkey. All applicants must register in the Researcher Information System (ARBIS), designed and developed by TÜBİTAK from the following link <https://arbis.tubitak.gov.tr/home.jsf> before submitting their application electronically via TÜBİTAK scholarship application portal, which can be reached at <http://e-bideb.tubitak.gov.tr/>. The application period of 2216 – Fellowship Program for International Researchers for the call of 2021 will be opened later.

More information:

<https://www.tubitak.gov.tr/en/funds/academy/international-researchers-fellowship-programmes/content-2216-research-fellowship-programme-for-international-researchers>

2221-Guest or Academic Leave (sabbatical) Scientist Support Program

Applications must be made at the latest in the application period before the guest/academic leave scientist will be brought in. Applications are made online at <http://e-bideb.tubitak.gov.tr>. The opening and accuracy of the files uploaded to the electronic application system

must be checked by the applicant. Except for the online application, documents sent to BİDEB by e-mail/mail or after the application is closed will not be evaluated.

More information:

<https://ebideb.tubitak.gov.tr/giris.htm?language=en>

2232 - International Leading Researchers Program

Within the scope of the program, research of strategic importance for our country to contribute to the projects to be carried out in their fields, who have distinguished themselves with scientific and / or technological studies and have experience of working abroad qualified researchers, especially Turkish scientists, from abroad to Turkey to encourage them to come to Turkey and to support their work by leading state or foundations in Turkey. in higher education institutions, in research infrastructures qualified within the scope of 6550, in public research institutes, private sector organizations with R&D or design centers or in the capital companies established in Turkey within the scope of techno-parks. support is given.

First Steps At LHU

All new staff will be asked to attend a meeting with the International Relations Office (IRO) departments, the date and time will be confirmed in a letter that will be sent to you. IRO will ask you to bring your passport, education certificates and other documents to the meeting –which is very important. IRO will take copies of your documents and you cannot start to work until the checks on your documents are completed by IRO.

All new starters must bring this documentation to be checked before any work starts, regardless of nationality. This meeting is a good opportunity to ask any questions or to request any employment confirmation documents you might need. You will also need to confirm details of the bank account in which your salary will be deposited. For any questions contact: (researcher@lokmanhekim.edu.tr). This will give you access to restricted areas of the university such as the library and any work areas which require swipe card access.

Recognition and Equivalence

Recognition: Acceptance by Council of Higher education that an international higher education institution and a relevant program of this institution are authorized to give academic degrees. Higher education institution which gives the diploma should be authorized by competent authorities of the country in which it operates, to give academic diplomas and degrees and there should be accreditation and quality assurance processes that are transparent, accessible and sustainable.

Equivalence: It is the determination of equivalence of associate degree, undergraduate and master's diplomas obtained from overseas higher education institutions and programs to Associate degree, Bachelor's and Master's degrees awarded by higher education institutions in Turkey in terms of achievements in related education level. Academic level of graduated higher education program, the degree and the qualification, the total of national credits and/or ECTS required for graduation are evaluated in terms of knowledge, skills and competencies that need to be gained.

Before applying, you must follow the steps on this website for recognition and equivalence processes.

<https://www.studyinturkey.gov.tr/StudyinTurkey/ShowDetail?rID=7kfKef+q+vg=8&cld=PE4NrOmMoY4=>

TUS Exam (Medical Specialty Exam)

The following are the explanations for the admission of foreign candidates to the Ministry of Health training hospitals and university medical faculties for specialty training in medicine.

The following procedure will be followed in the selection of candidates for medical specialization training through the central system:

Candidates who have passed the Foreign Language Exam to be held on the date specified in the guide or who have been exempted from foreign language by succeeding in at least one of the foreign language exams held in the previous two years will be selected by computer, taking into account the TUS-Science Exam Weighted Scores, the order of preference and the quota of the programs.

Article 16 of the Medical Specialization Regulation states that in order to take the Professional Knowledge Exam, a minimum score of 60 out of 100 must be obtained in the Foreign Language Exam. Candidates who have been exempted from TUSs in previous periods will retain these rights. Candidates who are new to the Foreign Language Exam or who are not exempt from previous TUS exams must get at least 60 points out of 100 from the Foreign Language Exam in order to take the science exam.

Lokman Hekim University offers TUS residency in 8 different fields. These are;
Department of Brain and Nerve Surgery
Department of General Surgery
Department of Internal Medicine
Department of Obstetrics and Gynecology
Department of Cardiology
Department of Physical Medicine and Rehabilitation
Department of Ear, Nose and Throat Diseases
Department of Medical Biochemistry

More information:

<https://www.osym.gov.tr/TR,4518/temel-ilkeler-ve-kosullar.html>

University Translational Medicine Research Center (Preclinical Research Laboratory)

There is a Central Preclinical Research Laboratory in our university. In this laboratory, studies are carried out in the following areas;

- Medicine and Drugs
- Natural products
- Cosmetic
- Medical Device
- Laboratory Analysis
- Translational Medicine Applications
- Cell Culture Studies.

The devices used in the laboratory are as follows;

- HPLC
- Incubator
- Spectrophotometer
- Fluorescence Detector
- Liquid nitrogen tank
- Refrigerated Centrifuge
- Real-Time PCR System
- Western Imaging System

In addition, LHU offers incoming researchers the opportunity to present and implement their own projects.

At the same time, our university has collaborated with important research Universities in Ankara for developing multidisciplinary research as a partnership. These are Bilkent University (UNAM) Excellence Science and Technology, Middle East Technical University, OSTİM Technical University.

Bachelor Programs

Medical School

It is objective to protect and improve the health of the individuals and the society with our students, academicians and staff who provide education to our students, health care workers and our people in the light of the ethical principles and academic values, produce information and knowledge at international level with qualified scientific studies and provide comprehensive and high quality health service. In the Medical School, education is given in both English and Turkish.

More information:

<https://www.lokmanhekim.edu.tr/en/fakulteler/tip-fakultesi/>

Faculty of Dentistry

It is to train dentists who combine their knowledge, skills and abilities in the field of dentistry with current developments, adhere to ethical principles and social responsibility awareness, open to change and development in all areas and have high communication skills in order to provide comprehensive and high quality health care.

More information:

<https://www.lokmanhekim.edu.tr/en/fakulteler/dis-hekimligi-fakultesi/>

Faculty of Pharmacy

It is to educate entrepreneurs and competent pharmacists with scientific thinking and ethical principles who can take an active role in all areas of pharmacy by applying an innovative training model with an experienced academic staff. In the Faculty of Pharmacy, education is given in both English and Turkish.

More information:

<https://www.lokmanhekim.edu.tr/en/fakulteler/eczacilik-fakultesi/misyon-ve-vizyon-2/>

Faculty of Health Sciences

Our faculty educates integrative, successful and contemporary graduates with an educational approach that highlights being scientific and moral values who never leave occupational ethics, who have been trained with scientific approaches and methods, who have the required competence, and who respect differences and universal values.

All departments of our faculty provide education in accordance with the Core Education Programs, and carry out the applied trainings at Lokman Hekim University Hospitals in addition to using the classrooms, laboratories and social areas of all faculties of our university for the theoretical and practice-research courses.

- Department of Nutrition and Dietetics

Our department educates leading Dietitians who are demanded and consulted who

Have the occupational ethics and understanding in Creating scientific solutions to protect and improve the nutrition level of the society and the individuals, Raising the life standards of the individuals, and determining the needs of energy and nutrition according to age, gender, physical activity, special and disease statuses, Organizing the nutrition plans and programs, Creating and developing national nutrition policies.

- Department of Physical Therapy and Rehabilitation

Our department educates sophisticated, knowledgeable, active and competence Physiotherapists who can take responsibility, have occupational competency and have the occupational ethics and understanding in Improving health and preventing diseases, Planning and implementing the treatment approaches developed in the world, Improving the quality of health and life. The dual degree could be done with the Ergotherapy bachelor program.

- Department of Ergotherapy

Ergotherapy department trains its students with the understanding of quality health provided by Lokman Hekim University within the framework of its mission and vision. This department gives dual degree opportunity with Physiotherapy and Rehabilitation Department.

More information:

<https://www.lokmanhekim.edu.tr/fakulteler/saglik-bilimleri-fakultesi/ergoterapi/>

- Department of Audiology

The audiology undergraduate program of our university is a 4 year program and the language of instruction is Turkish. Graduates of the department of audiology,

who are interested in the diagnosis and rehabilitation of hearing and balance disorders, gain the title of audiologist. Our health themed University; aims to train audiologists who are internationally equipped in terms of professional knowledge and skills, modern, innovative and committed to professional and ethical values. Program courses are carried out both theoretically and practically. This department gives dual degree opportunity with Department of Language Therapy

More information:

<https://www.lokmanhekim.edu.tr/fakulteler/saglik-bilimleri-fakultesi/odyoloji/>

- Department of Language Therapy

Graduates of Language and Speech Therapy who are interested in the evaluation, diagnosis and rehabilitation of communication, language, speech, voice and swallowing areas; graduates with the title of "Language and Speech Therapist". Our department, which offers wide job and career opportunities; is 4 years and the language of education is Turkish. The courses are carried out theoretically and practically, and professional internships are included in the curriculum. This department gives dual degree opportunity with Department of Audiology.

More information:

<https://www.lokmanhekim.edu.tr/fakulteler/saglik-bilimleri-fakultesi/dil-ve-konusma-terapisi/>

- Department of Nursing

Our department educates competent, ethical and principled Nurses who Help to protect and improve the health of the individuals and the society, Participate in the processes of treatment, care and recovery of the patient, Are able to establish strong communication with the

professionals of the nursing profession, Work in an integrative and scientific way, and think critically and sophisticatedly.

- Department of Midwifery

Our department educates competent and active Midwives who
Provide the care and consultancy required during pregnancy, and during and after birth,
Are able to deliver normally under her responsibility,
Are able to monitor the mother and the new born during pregnancy, and during and after birth,
Provide consultancy about new born care and family planning,
Are able to use the professional midwifery approaches, and defend the mothers' and the new borns' rights.

More information:

<https://www.lokmanhekim.edu.tr/en/fakulteler/saglik-bilimleri-fakultesi/sbf-misyon-ve-vizyon/>

Faculty of Sports Sciences

Our faculty undertakes a mission to provide quality service in education and training, produce information in accordance with the needs of the age research and projects to and serve the community.

More information:

<https://www.lokmanhekim.edu.tr/en/fakulteler/spor-bilimleri-fakultesi/misyon-ve-vizyon-32/>

Vocational Health Schools

Vocational School raises auxiliary health personnel who can conduct interdisciplinary cooperation and teamwork in the field of health and who are competent with respect to the profession in the health services area that the country needs through utilizing the accumulation of science and technology in the light of universal values, respectful to social values and who is qualified. In addition to providing a multidisciplinary education to our students, our school provides practice training in Lokman Hekim University Hospitals.

There are 11 departments under the vocational school including; Emergency and First Aid, Anesthesia, Medical Laboratory Techniques, Medical Imaging Techniques, Operating Room Services, Dental Prosthetic Technology, Mouth and Dental Health, Pharmacy Services, Dialysis Elderly Care, Optician.

Dual degree opportunities are provided between the programs that you selected.

Observership for Clinical

If you want to be a clinical observer, Lokman Hekim University Hospitals have suitable conditions for this. There are three main hospitals and a medical center in Ankara. These are Lokman Hekim University Ankara Hospital, Akay, Etlik Hospitals and Demetevler Medical Center. We have also a Lokman Hekim University Sogutozu Dentistry Hospital and Rehabilitation Center. You can be a clinical observer in many areas, and you can find the opportunity to examine patients and cases on-site.

Applicants should review the website of Lokman Hekim University before application to ensure orientation and focus of the department they wish to apply match their interests.

<https://www.lokmanhekim.edu.tr/duyuru/lhu-2021-2-donem-tipta-uzmanlik-katalogu-yayinlandi/>

For the observership application, you should complete the application procedures as written on page 2 and you must address your preference on your motivation letter. The medical staff can speak English with you but keep in mind that patients in the hospitals generally speak Turkish.

The clinical observership program isn't for only medical students but also for nurses, midwifery, physiotherapists, dietitian, pharmacists. The students of vocational health schools can benefit from this opportunity.

Medical Innovation and Simulation Research and Training Center (LHUSINERG)

The center was established to enable health professionals who are educated in different fields to use innovative models in education and to reflect them in their practices. It is aimed to enable the use of simulation models in education in fields such as medicine, dentistry, pharmacy, physiotherapy, nursing and midwifery etc. Surgical practical educations have been carried out using fresh cadavers and simulators since establishing the research and practicing center, in addition, real body segment models can be produced with 3D printer. However, the center, which provides simultaneous practical education on real cases, also has a mission to lead in national and international research projects.

The center has two different laboratories: cadaveric part and 3D application part. Within the 3D part, it contains biocompatible 3D medical printer (SLA) and Mimics software for 3D reconstruction. The lab creates 3D physical simulators, 3D virtual models and anatomic education-based phantoms. The center will ensure post-doc on 3D modeling, 3D printing and technology-based programmes in health sciences.

For more information and to reach images about our scientific events, please visit our website:

International Collaborations

Lokman Hekim University has the Erasmus Charter for Higher Education (ECHE) document, which is required by higher education institutions to participate in Erasmus+ activities. With this document, higher education can benefit from all Erasmus+ activities for the 2021-2027 period.

LHU provides short-term visit opportunities, internships, work observation activities, Erasmus+ staff mobility opportunities for its employees to different countries of the world.

The countries we have agreements with are as follows; Macedonia, Portugal, France, Germany, Serbia, Portugal, Slovakia, Italy, USA, Canada, Iran, Azerbaijan, Kazakhstan and Kosovo.

You can send an e-mail for your questions about international cooperations;
erasmus@lokmanhekim.edu.tr

LHUDİLMER-Turkish Teaching Center

Lokman Hekim University Language Teaching, Application and Research Center's Turkish language teaching course for international students provides education to its students with a professional and scientific approach with its expert staff. The programs we implement in our foreign language courses, which focus on the language used in daily life, focus on speaking and listening skills. Those who attend these courses are given foreign language skills training that they may need in individual and corporate life.

LHUDİLMER, which provides training in four skills, focuses on the development of students' speaking and writing skills, while at the same time preparing certificates of participation and certificates. Certification exams are held for foreign students. Before starting education, our students pass written and oral level determination tests, and according to the results, they are placed in classes suitable for their level. Our students act with the principle of "learning by living" with a teaching staff consisting of lecturers in classes with a maximum of 16 people.

Historical Places & Museums

Anıtkabir

Anıtkabir is the mausoleum of Mustafa Kemal Atatürk, the leader of the Turkish War of Independence and the founder and first President of the Republic of Turkey. It is located in Ankara and was designed by architects Professor Emin Onat and Assistant Professor Ahmet Orhan Arda, whose proposal beat 48 other entries from several countries in a competition held by the Turkish Government in 1941 for a “monument” for Atatürk.

Ankara Kalesi

It is a historical castle located in Altındağ district of Ankara. Although it is not known exactly when it was built, it is known that the castle existed at the beginning of the 2nd century BC when the Galatians settled in Ankara. It was repaired many times during the Romans, Byzantines, Seljuks and Ottomans. Ankara Castle is bigger than it looks from the outside. It also hosts various festivals every year.

Hacı Bayram Mosque

Hacı Bayram Veli Mosque is a mosque in Ankara. Along with Kocatepe Mosque it is one of the best-known mosques in Ankara. Hacı Bayram Mosque was built during the Ottoman Empire period. It was named after the Turkish Sufi and poet Hacı Bayram-ı Veli on behalf of the latter. Hacı Bayram Mosque is one of the touristic places of Ankara. The site was added in 2016 to the tentative list of UNESCO World Heritage Sites in Turkey

Hamamönü Street

Hamamönü is a historical region located in Altındağ district of Ankara province. It remains within the borders of Hacettepe District. The historical buildings, which are examples of 19th century civil architecture in the region, were restored and the region was revived. Hamamönü took its name from the Double Bath, which was built by Karacabey, one of the Bayındır tribesmen of the Oghuz tribes. The historical Karacabey Bath is located here. Mehmet Akif Ersoy Park, where the Turkish National Anthem is written, and Mehmet Akif Ersoy Museum House are located in the park.

Anatolian Civilizations Museum

This fascinating museum contains over 200,000 historic pieces of which only a fraction can be displayed at one time. Exhibits include Early Bronze Age statues and Neolithic wall paintings.

Rahmi M. Koc Museum

Çengelhan Rahmi M. Koç Museum is the first and only industrial museum in Ankara. Like its namesake, it is dedicated to the history of Transport, Industry and Communications, with additional material on Ankara and the founder of the Turkish Republic, Mustafa Kemal Atatürk. Housed in a magnificent building before the entrance to the Ankara Citadel, the collection contains hundreds of items from miniatures to full size boats and vehicles. The location is unrivalled – romantic, historic, convenient. And the appeal is universal: objects that affect our daily lives, created by talented engineers and craftsmen, encapsulating man's ingenuity and hard work yet at the same time exhibiting great beauty. Our museum educates, informs, and entertains tens of thousands of adults and children each year.

Museum of Republic

Built in 1923, the building served as the II. Turkish Grand National Assembly between 1924 - 1960 and played an important role in the establishment of the new Republic. Later in 1981, the building was opened as Museum of Republic.

Gökyay Chess Museum

The Gökyay Association Chess Museum is located in Altındağ, Ankara, Turkey and displayed in a historical home. The museum has the largest chess set collection in the world with 570 chess sets collected from 103 countries exhibited under four main themes in a 1,008 square meter area.

Erimtan Archeology and Arts Museum

Erimtan Museum was established in 2015 by a private society named "Cultural Heritage Collectors' Society" which was founded in 1996. The museum was named after the founder of the society Yüksel Erimtan, an engineer and an archaeology enthusiast, who endowed his private collection to the museum. The museum collection consists of nearly two thousand portable artifacts under the supervision of the Museum of Anatolian Civilizations. Almost all of the artifacts have Anatolian origin. The collection covers a period of time extending from three thousand BC to the Byzantine times.
